“As a supplier in the green space we had two reasons to join Green Advantage.

We have had two delegates on this course so far, our HR manager and a partner manager. The course is brilliantly run with up to date truly valuable content and case studies and I would recommend it to all.

Going green isn't just vital for the planet, it also makes financial sense as demonstrated by this programme.”

**Andrew Leech**  
Director, Fleet Evolution

# Gain a Green Advantage

- **Reinvntd CIC:** “Since completing the course, I am more conscious about my business and the impact of every decision we make, but also in my day-to-day life.
- **Love Joes:** "We became a living wage employer as a result of Green Advantage. We've started a lot more governance around our policies and our supply code of conduct is in the works as well. The speakers that you hear while you're there are so informative and they open so many light bulbs that you might not even think apply to you."
- **Metal Assemblies:** “I have come away from the programme feeling energised to continue bringing positive change to Metal Assemblies. As well as having a better understanding of sustainability principles, how they can be applied to the business and the importance of creating a team that is committed to embedding sustainability into the organisation.”

- Aston specialists from business and engineering
- Expert facilitators and coaches
- Discussion amongst fellow cohort members
- Space to learn and reflect
- A clear roadmap for sustainable growth
